## [Instanced Dungeon]

1. Added new Instanced Dungeon 'Allos Cosmos'.

A sacred land where the Gangcheol (Fire Dragon) has been born since ancient times.

In the deepest part of the city, there are shrines and caves where the descendants of Gangcheol practiced, and a village has formed around them.

Under the protection of the descendants of Gangcheol, the town was one of the most livable places in the world, until one day, an evil presence from another world began to fill the air with the groans of its people.

Born from the plague brought by the invaders, the vicious energy of the monster dried up the town's clear water and vegetation, attracting all manner of demons and fiends.

One by one, the terrified people have fled the village, which is now a shadow of its former self, leaving Guru Imugi and the village guardian to protect the few remaining villagers from the monsters.

It is a different world from Atreia, a place far to the east, called the Outlander.
